

# Student Clicker Guide

## Purchasing a Clicker

---

You can buy a Response Card (Clicker):

- at the **Penn Bookstore**

OR

- **online** at <https://store.turningtechnologies.com/> using the code Bg2Y get Penn's discounted pricing if your instructor allows it, you can purchase ResponseWare at this link and use your smartphone instead of a physical clicker.

## Registering your Clicker

---

A ResponseCard (clicker) must be registered to receive credit in class.

- 1 **Log** into Canvas and navigate to your course site.
- 2 Click the **Modules link** from the left menu.
- 3 Click the **Turning Technologies Registration Tool Turning Point link** under the *Course Modules*

**Register a New Response Device**

**Device Id required.**  
Device Id\* (6 or 8 characters 0-9, A-F)

**ResponseCard keypads:** Device Id can be found on the back of your device.  
**ResponseWare users:** Your Device Id is at the bottom of the ResponseWare page after logging in and clicking on "Your Account."

Device ID

Register Device

Turning Technologies

- 4 Enter your ResponseCard (clicker) **Device ID** in the field
- 5 Click **Register Device**.

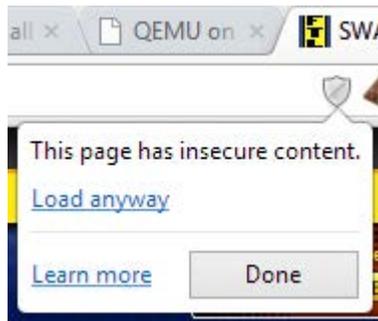

If you have any trouble with this, see *Troubleshooting* on the next page.

## Troubleshooting

### If you get an error message or a blank page when you try to register a Device ID...

This is likely because your browser objects to the "insecure content" on the page. All browsers have a work-around to allow you to knowingly load insecure content.

For example, in Chrome, when you visit a secure page with insecure content, a shield icon will appear at the right edge of the omnibar. Click on the shield icon, and then click Load anyway, and the insecure content will be loaded.

### If you have an older clicker such as a Response Card RF or NXT

See [http://www.sas.upenn.edu/computing/instructional/clickers\\_more#students](http://www.sas.upenn.edu/computing/instructional/clickers_more#students) for instructions on how to check the firmware version of an older clicker and how to update it if necessary.

**Please note:** This does not apply to the firmware versions on the new ResponseCard QT (with a full QWERTY keyboard). The firmware on that restarted with version 1.0.0, but it is fully compatible with our current receivers.
